DX3608-01	6'8	19 3/8	2 5/8	34.02	2 11/16	11 1/4

The DX1 is my refined ultimate performance design, this rocker has stood the test of time. Each year I just make a few refinements to this rocker and it just keeps getting better. It was the DX1 that Adriano won J'Bay on and said it was the best board he has ever ridden. Most of my team have one of these designs in their quiver, it is versatile in all conditions and continues to perform.

The DX1 is a great example of all the elements coming together for that perfect balance. It runs a single concave all the way through that gets quiet deep through the belly into the tail. Smooth plan shape combined with a smooth rocker and a tight super squash tail. The DX1 is that go to performer for all conditions. Proven and tested by the team, my mates and surfers around the globe. If you are a one board quiver type of surfer, the DX1 is for you.

RRP: \$825
